

New Build Procedures for Residential Structures

1. For a new build, contact a qualified Soil Scientist and a contractor with excavation equipment. A contractor will dig pits no more than 60” in a location advised by the Soil Scientist for evaluation of the soil composition. A list of Soil Professionals can be found on page(s) 1-2 of this document. The Soil Scientist will send their completed soil analysis to you. Please make sure our office gets a copy of the report so we can proceed with the Site Review; Step #2.
2. Your lot may require a new house number. If so, please contact Carroll County Regional Planning Commission at 330-627-5611. Our office will need this house number to maintain accurate records for your permit and design.
3. Come into our office or call at 330-627-4866 #1522 to schedule a Site Review of the lot. You must submit payment and a site review application; the current fee is \$325.00. The application may be found on our website at carroll-lhd.org or may be requested via phone or email. (Please submit a copy of your soil analysis for our records if not already done).
4. Once the Site Review is approved by our office, it will be sent to individuals identified on Site Review application via email. Please ensure everyone you want to be notified is on the application. An approved Site Review is valid for five (5) years, unless the area of soil evaluation is disturbed. This is a good time to contact a Septic Installer of your choice. Please see the following pages of this document for a list of approved installers in Carroll County. They may request a copy of your approved site review application, as this is needed to start the design process. Additionally, there is a list of designers in this document.
5. Have a Sewage Treatment System Design created. Follow this link for a list of designers by County: <https://odh.ohio.gov/know-our-programs/sewage-treatment-systems/media/designer-contact-list> or see the following pages of this document.
6. You or your installer/designer must submit the completed Design to our office for review. The proposed septic system must be flagged on the property and an inspector from this office will conduct a final Site Evaluation Design Check before the design is approved. Once your Design has been approved, you or your Carroll County registered Septic Installer can pull the Septic Permit. The current fee for a Septic Permit is \$724.00. The permit must be pulled before work is started.
7. Our office requests a three (3) business day notice for inspection. Some systems may require additional inspections based on the design, please plan accordingly. Once the final inspection has been completed, the registered Septic Installer must submit an “As-Built” drawing to our office. Final approval of the septic system will not be given until all necessary inspections have been conducted and our office has all the required documentation.
8. If your home will be serviced by a water well, you or a Private Water Systems Contractor (Well Driller) registered in Ohio must apply for a permit with our office. The current fee for a water well permit is \$544.00 for a single-family dwelling. For a list of Private Water Systems Contractors please visit: <https://odh.ohio.gov/know-our-programs/private-water-systems-program/media/list-regpwsc-ohio>

Soil Scientists

An individual who conducts an evaluation of the soil for the purpose of siting and designing a septic system. The link below can be used to search for a local soil expert: <https://www.soils.org/certifications/professional-search/>

Association of Ohio Pedologist List

Name and Certification	Contact Information
