

Water Sample Application

Name of Requester: _____ Date: _____

Address where sample will be taken: _____

Phone: _____

Mailing Address: _____

Email: _____

Signature: _____

Has the Private Water System (water well) been recently chlorinated? **Y or N**

If yes when? _____

If a water sample is scheduled to be taken for bacteriological analysis, and chlorine is present within the water due to a recent chlorination, or no one is present at the property to meet the environmental health specialist (EHS), the sample will not be taken. The Carroll County General Health District's (CCGHD) current re-inspection fee of \$65.00 will be required to be paid before the EHS will be able to come back to collect the sample.

If the water well has recently been chlorinated, the sample cannot be taken until 48 hours after the chlorine solution has been flushed from the system.

Reminder calls to collect payment will not be made.

If the water sample results exceeds the maximum contaminant levels (a result greater than 4.2mpn) the water well should be disinfected and re-sampled. **CCGHD environmental health specialists can re-sample the water well for a re-sample fee of \$65.00.** Registered water well contractors can also sample wells for real estate purposes. If a registered well contractor, re-samples the water well the CCGHD may request a copy of the results for the property file.
